

## Line puller

## slide hammer

## Lever puller

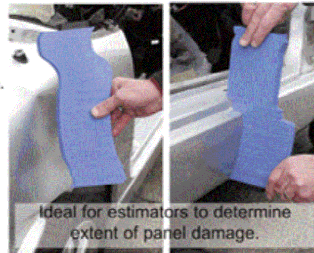

## profiler

### Panel & Image Profiler

**Use as PANEL profiler.**  
Go to undamaged side of vehicle & make a template. Now you can check your progress during repair.

**Use as IMAGE profiler** to show extent of damage when imaging. Especially good on colours where damage is difficult to see.

Ideal for estimators to determine extent of panel damage.

High density nylon, lightweight & ultra strong. Minimise panel marking. Shock resistant for less operator fatigue. Great on thin panels & aluminium. Chisel heads can be reshaped & dressed to suit various panel repair jobs.
